Tennessee Domestic Security & Illicit Finance Risk Intelligence Assessment

County-level OSINT model for illicit-finance vulnerability, cash-economy exposure, tactical-access indicators, organized/group criminal activity, explosive-use indicators, targeted-harm indicators, public-safety personnel pressure, disaster/disruption vulnerability, institutional/enforcement pressure, public group/network reference context, TDOC correctional-system STG context, law-enforcement response-capacity context, operational-risk exposure, protective-planning resilience, and domestic security risk

Prepared by Jason Keen | Generated 2026-05-30

Executive Summary

This report presents a county-level open-source intelligence model for Tennessee focused on domestic security risk conditions, illicit-finance vulnerability, cash-economy exposure, formal banking access gaps, regulated retail indicators, lawful firearm-license aggregate exposure, tactical-access indicators, TBI CrimeInsight crime/weapons pressure, TBI organized-crime and explosive-use aggregate indicators, hate-crime / targeted-harm indicators, law-enforcement ambush indicators, ACLED political violence / civil unrest exposure, disaster/disruption vulnerability, and institutional/enforcement pressure. In the current model run, the highest-scoring county is **Davidson**, with a final domestic security risk score of **59.0**, a signal of **Elevated**, and model confidence of **High**.

The report also includes an **Operational Risk & Protective Planning** layer. This separate county-level layer combines public indicators related to population exposure, transportation pressure, infrastructure needs, public-safety context, healthcare capacity, FEMA vulnerability/resilience, and CSLLEA law-enforcement response-capacity baseline. In the current run, the highest operational-risk county is **Davidson**, with a final operational-risk score of **58.4** and a tier of **Elevated**.

This model does **not** predict attacks, identify suspects, assess individual businesses, assess individual licensees, or label lawful activity as suspicious. Gang-related crime, explosive-use offenses, hate-crime offense counts, law-enforcement ambush counts, and gang-related explosive-use offenses are not terrorism labels. They are county-level high-severity criminal activity indicators that may warrant additional analysis when combined with other public-source layers. All sensitive scoring inputs are aggregated to the county level. Public group/network, TDOC correctional-system STG context, and statewide hate-crime context appendices are reference-only and are not included in risk scoring.

Phase 6 Model Structure

Component	Purpose	Status
Finance & Tactical Vulnerability	Financial stress, banking access, cash-intensive retail, regulated retail, and FFL / tactical-access proxies.	Active
Organized Violence / High-Severity Crime Pressure	TBI crime/weapons, overall crime rate, gang activity, explosive-use, gang + explosive intersection, and targeted harm / public-safety layers.	Active
Political Violence / Civil Unrest	ACLED-derived county-level protest, public disorder, political violence, strategic development, and fatality indicators.	Active
Disaster / Disruption Vulnerability	FEMA disaster declarations plus county-level disruption, access stress, communications, recovery strain, and vulnerability indicators.	Active
Institutional / Enforcement Pressure	Public-safety personnel pressure, law-enforcement assault / ambush, crime pressure, targeted harm, and disruption strain.	Active
Operational Risk & Protective Planning	County-level exposure, resilience gap, infrastructure pressure, healthcare capacity, transportation pressure, and CSLLEA law-enforcement response-capacity baseline.	Active
Data Quality / Model Confidence	Coverage flags for ACS, CBP, FDIC, FFL, FEMA, TBI CrimeInsight, ACLED, gang, explosives, hate crime, ambush, and institutional layers.	Active
Crime Trend Analysis	2023-to-2024 TBI CrimeInsight selected crime/weapons trend analysis.	Active

Component	Purpose	Status
Sensitivity Analysis	Alternative weighting scenarios and top-county rank stability.	Active
Reference / Context Appendices	Public group / network reference register, TDOC correctional-system STG context, and statewide TBI hate-crime context.Reference-only and not included in risk scoring.	Active

Key Findings

The top counties by final domestic security risk score are **Davidson, Shelby, Madison, Hamilton, Hamblen**. The top counties by finance and tactical vulnerability are **Coffee, Hamblen, Rhea, Madison, Cumberland**. The top counties by organized violence / high-severity crime pressure are **Shelby, Davidson, Lauderdale, Madison, Dyer**. The top counties by gang + explosive intersection pressure are **Van Buren, Carroll, Lauderdale, McMinn, DeKalb**. The top counties by ACLED political violence / civil unrest exposure are **Davidson, Shelby, Trousdale, Knox, Hamilton**. Average active-source completeness for this model run is **100.0**. These rankings should be interpreted as relative county-level monitoring-priority indicators, not as findings of criminal conduct, extremist activity, or terrorism.

Top County Risk Rankings

County	Finance / Tactical	Organized Violence	Political Violence	Financial Stress	Tactical Access	Disaster / Disruption	Final	Signal	Confidence
Davidson	42.9	60.0	100.0	49.7	27.8	76.4	59.0	Elevated	High
Shelby	49.9	64.3	44.2	64.8	25.3	66.7	54.8	Guarded	High
Madison	53.0	37.6	11.9	65.1	30.9	49.7	43.4	Guarded	High
Hamilton	48.2	29.4	22.9	45.3	35.7	61.6	40.2	Guarded	High
Hamblen	55.4	33.2	0.0	58.5	38.0	35.7	39.2	Guarded	High
Lauderdale	42.3	46.7	0.0	64.1	21.5	45.5	39.1	Guarded	High
Jackson	47.6	15.1	0.0	65.2	31.3	83.3	38.4	Guarded	High
Hardeman	46.6	33.7	0.0	74.7	28.9	33.9	38.3	Guarded	High
Lake	46.0	26.9	0.0	77.2	21.2	48.1	38.2	Guarded	High
Coffee	57.1	26.8	0.0	48.7	40.2	47.3	38.1	Guarded	High
Hancock	50.2	13.3	0.0	85.0	35.9	45.8	38.0	Guarded	High
Hardin	48.6	21.6	0.0	61.1	31.9	63.9	37.6	Guarded	High
Obion	48.9	30.2	0.0	52.8	41.4	50.9	37.4	Guarded	High
Cocke	49.6	22.8	0.0	61.3	32.3	53.9	37.1	Guarded	High
Washington	49.1	24.4	18.6	53.0	41.1	32.3	37.1	Guarded	High

Finance, Cash Economy & Tactical Access Layer

The finance and tactical-access layer captures county-level exposure to household financial stress, formal banking access gaps, cash-intensive commerce, regulated retail environments, lawful firearm-license aggregates, and lawful tactical-access indicators. Importer FFL and destructive-device-related FFL counts are treated as high-sensitivity subtype indicators. The destructive-device-related field can overlap with importer/manufacturer categories and should not be summed with subtypes to reconcile to total FFL count.

Subcomponent	Variables / Proxies	Interpretation
Household Financial Stress	Poverty, unemployment, rent burden, income stress	Economic pressure and household vulnerability
Banking Access Gap	Bank branches per 10k residents and deposits per capita	Formal financial access and financial-system depth proxy
Cash-Intensive Retail	Used merchandise, gas stations, convenience stores, lending, laundry, used auto	Cash-flow and small-business exposure proxy
FFL / Tactical Access	Dealer, manufacturer, pawnbroker, collector, importer, destructive-device subtype, training, surplus, ranges	Lawful access and regulatory-complexity proxy

County	Branches	Deposits / Capita	Bank Gap	Cash Retail	FFL	Dealer	Mfr.	Importer	Destr. Device	Tactical	Finance Score
Coffee	18	$24,904	72.6	63.4	21	11	7	0	0	40.2	57.1
Hamblen	13	$20,634	84.0	50.2	25	16	6	0	0	38.0	55.4
Rhea	8	$18,416	82.0	35.9	12	8	3	0	0	45.0	54.1
Madison	34	$26,739	68.1	51.8	18	13	3	0	0	30.9	53.0
Cumberland	16	$27,914	75.3	59.6	28	16	7	0	0	31.6	51.8
Putnam	31	$39,596	58.1	52.2	29	16	11	1	0	42.0	51.3
Carter	13	$17,809	82.8	28.8	18	9	7	0	0	39.6	51.1
Hancock	2	$14,594	79.2	7.4	4	2	2	0	0	35.9	50.2
Shelby	205	$34,866	73.9	39.4	100	56	27	2	1	25.3	49.9
Cocke	8	$21,786	81.6	28.1	17	9	5	0	0	32.3	49.6
Sevier	44	$40,953	51.6	48.5	30	17	12	1	0	46.3	49.4
Sullivan	34	$14,855	86.0	34.1	65	41	20	1	0	46.9	49.1

Organized Violence & High-Severity Crime Pressure

The organized violence / high-severity crime pressure layer combines multiple TBI-derived aggregate indicators: selected crime/weapons pressure, overall crime-rate pressure, gang-related criminal activity pressure, explosive-use criminal activity pressure, the gang + explosive intersection pressure layer, and targeted harm / public-safety pressure. The gang, explosives, and gang + explosives layers are not terrorism indicators. They are high-severity county-level criminal activity indicators used to identify where additional analytical review may be warranted.

Subcomponent	Weight	Interpretation
Crime / Weapons Pressure	30%	Selected TBI crime/weapons categories
Overall Crime Rate Index	15%	Overall county crime rate and total crime pressure
Gang-Related Activity Pressure	18%	Organized/group criminal activity proxy
Explosive-Use Pressure	13%	High-severity capability/criminal-use proxy
Gang + Explosive Intersection	13%	High-severity organized/group + explosive-use intersection proxy
Targeted Harm / Public-Safety Pressure	11%	Bias-motivated offense and public-safety personnel violence proxy

County	Crime / Weapons	Overall Crime	Gang	Explosive	Gang + Explosive	Targeted Harm	Organized Score
Shelby	90.2	100.0	90.3	19.5	19.5	7.9	64.3
Davidson	79.0	89.6	77.3	25.2	25.2	21.4	60.0
Lauderdale	61.3	39.5	47.9	50.5	50.5	5.6	46.7
Madison	52.0	57.6	45.7	17.5	17.5	5.6	37.6
Dyer	45.3	50.0	35.0	28.7	28.7	5.6	35.4
Hardeman	46.4	31.6	32.0	33.6	33.6	5.6	33.7
Hamblen	42.2	49.5	37.0	17.5	17.5	17.5	33.2
McMinn	27.6	30.2	25.8	48.2	48.2	10.9	31.2
Marshall	27.4	32.4	27.9	41.6	41.6	14.1	30.5
Obion	33.2	38.0	30.2	27.0	27.0	18.7	30.2
Haywood	42.2	41.1	32.3	17.5	17.5	5.6	29.8
Hamilton	33.7	45.2	36.2	19.4	19.4	8.3	29.4
Montgomery	34.3	39.3	32.1	21.7	21.7	8.6	28.6
Sullivan	30.3	40.3	27.2	29.5	29.5	7.4	28.5
Van Buren	13.1	24.5	22.0	62.5	62.5	5.6	28.4

Gang, Explosive-Use & Intersection Layers

This section presents aggregate county-level counts for the Phase 6 TBI organized/high-severity layers. These fields do not identify individuals, groups, gang names, locations, incident IDs, addresses, victims, suspects, organizations, or case narratives. They are intended only to strengthen county-level monitoring-priority analysis.

County	Gang Total	Gang Violent	Gang Weapon	Explosive Total	Explosive Weapon	Gang+Explosive Total	Gang+Explosive Weapon	Gang+Explosive Score
Van Buren	277	9	8	1	1	1	1	62.5
Carroll	885	48	38	3	1	3	1	56.2
Lauderdale	1,550	251	78	2	0	2	0	50.5
McMinn	2,782	215	50	5	3	5	3	48.2
DeKalb	678	69	37	2	2	2	2	45.1
Anderson	3,840	285	81	5	0	5	0	43.3
Marshall	1,954	168	64	3	3	3	3	41.6
Hardeman	1,315	149	84	1	0	1	0	33.6
Humphreys	870	76	21	1	1	1	1	32.6
Sullivan	10,172	869	150	5	1	5	1	29.5
Dyer	2,736	249	58	1	0	1	0	28.7
Obion	1,820	169	39	1	1	1	1	27.0
Claiborne	867	93	16	1	1	1	1	26.4
Bradley	6,950	428	137	3	2	3	2	26.4
Davidson	90,084	9,567	4,487	14	2	14	2	25.2

Targeted Harm & Public-Safety Personnel Pressure

The targeted harm / public-safety personnel pressure layer combines TBI hate-crime offense aggregates with law-enforcement ambush aggregates. These indicators are not terrorism labels and do not infer motive, ideology, or actor identity. They are county-level public-safety pressure indicators that may warrant further contextual review when combined with other model layers.

County	Hate Crime Total	Hate Intimidation	Hate Agg. Assault	Hate Weapon Law	LE Ambush Total	LE Ambush Agg. Assault	LE Assault	Targeted Harm Score
Lake	1	0	1	0	0	0	0	35.9
McNairy	0	0	0	0	2	1	0	34.9
Benton	2	1	0	0	0	0	0	30.7
Meigs	1	1	0	0	0	0	0	27.5
Fentress	0	0	0	0	1	1	0	25.3
Blount	7	3	0	0	1	0	0	24.4
Carter	4	3	0	0	0	0	0	23.0
Jackson	1	0	1	0	0	0	0	22.2
Davidson	29	11	2	1	1	0	0	21.4
Bedford	3	1	0	0	0	0	0	19.2
Obion	2	0	0	0	0	0	0	18.7
Hamblen	3	2	0	0	0	0	0	17.5
Bradley	5	1	1	0	0	0	0	16.4
Dickson	2	2	0	0	0	0	0	16.1
Knox	18	15	1	0	0	0	0	15.9

Disaster & Disruption Vulnerability Layer

The disaster / disruption vulnerability layer extends the FEMA disaster declaration history with optional county-level severe weather, power disruption, access stress, communications disruption, social vulnerability, recovery strain, and repeat-disruption exposure fields. This layer is designed to capture disruption conditions that can increase planning complexity, strain public resources, or affect continuity and response posture.

County	FEMA Decl.	Recent Decl.	Severe Weather	Power Disrupt.	Access Stress	Recovery Strain	Disruption Score
Jackson	35	11	50.0	50.0	50.0	50.0	83.3
Davidson	28	14	50.0	50.0	50.0	50.0	76.4
Dickson	27	13	50.0	50.0	50.0	50.0	67.3
Shelby	28	12	50.0	50.0	50.0	50.0	66.7
Decatur	28	13	50.0	50.0	50.0	50.0	65.3
Houston	28	11	50.0	50.0	50.0	50.0	63.9
Hardin	28	11	50.0	50.0	50.0	50.0	63.9
Cheatham	25	13	50.0	50.0	50.0	50.0	63.0
Wayne	27	11	50.0	50.0	50.0	50.0	61.8
Hamilton	25	11	50.0	50.0	50.0	50.0	61.6
Henderson	27	12	50.0	50.0	50.0	50.0	60.4
Tipton	25	12	50.0	50.0	50.0	50.0	60.2
Gibson	28	11	50.0	50.0	50.0	50.0	59.8
Sevier	23	10	50.0	50.0	50.0	50.0	58.6
Scott	26	9	50.0	50.0	50.0	50.0	58.2

Institutional & Enforcement Pressure Layer

Institutional / enforcement pressure is now an active derived layer. It combines law-enforcement ambush pressure, law-enforcement assault pressure, crime/weapons pressure, overall crime-rate pressure, targeted harm / public-safety pressure, and disaster/disruption vulnerability. The score is intended to represent county-level public-safety and institutional response pressure, not misconduct, ideology, or threat actor identity.

County	LE Assault Pressure	LE Ambush Pressure	Crime / Weapons	Overall Crime	Targeted Harm	Disruption	Institutional Score
Shelby	50.0	12.5	90.2	100.0	7.9	66.7	53.6
Davidson	50.0	13.1	79.0	89.6	21.4	76.4	52.3
McNairy	50.0	77.5	24.7	22.9	34.9	46.0	45.8
Fentress	50.0	56.2	25.9	21.9	25.3	58.0	40.9
Madison	50.0	12.5	52.0	57.6	5.6	49.7	37.7
Lauderdale	50.0	12.5	61.3	39.5	5.6	45.5	36.4
Dyer	50.0	12.5	45.3	50.0	5.6	52.5	35.5
Hamblen	50.0	12.5	42.2	49.5	17.5	35.7	34.3
Hamilton	50.0	12.5	33.7	45.2	8.3	61.6	33.6
Obion	50.0	12.5	33.2	38.0	18.7	50.9	32.4
Tipton	50.0	12.5	38.4	31.3	5.6	60.2	32.1
Lake	50.0	12.5	36.8	20.6	35.9	48.1	32.0
Haywood	50.0	12.5	42.2	41.1	5.6	34.8	31.8
Montgomery	50.0	12.5	34.3	39.3	8.6	48.1	31.6
Coffee	50.0	12.5	31.8	44.4	5.6	47.3	31.4

TBI CrimeInsight Crime & Weapons Pressure Layer

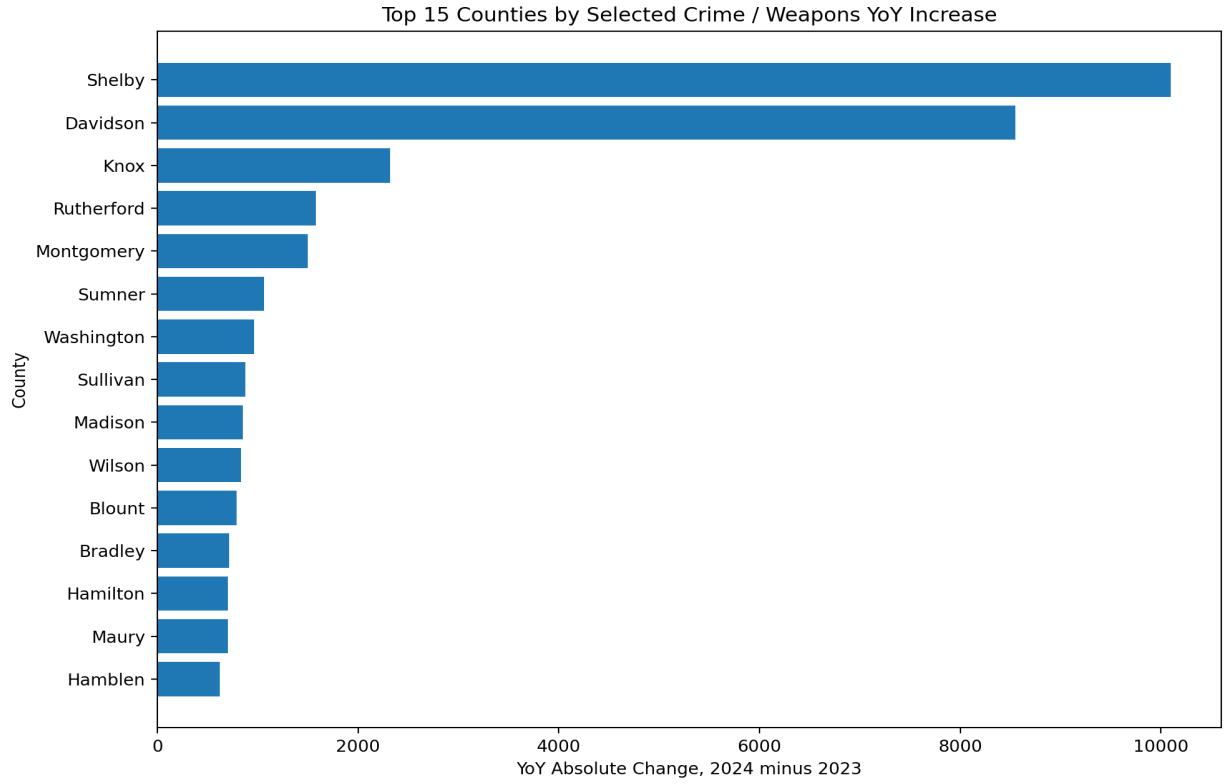

The crime/weapons pressure layer uses TBI CrimeInsight or TNCrimeOnline aggregate county-level offense exports. Current fields include homicide, kidnapping/abduction, weapon law violations, violent crime, aggravated assault, arson, sex offenses, hate crime, and law-enforcement assault when available. The model uses county-level counts and per-capita rates only.

County	Homicide	Kidnap	Weapon Law	Violent Crime	Agg Assault	Arson	Sex Off.	Weapon Rate	Crime Score
Shelby	348	786	7,262	19,020	16,799	406	1,087	79.0	90.2
Davidson	178	508	6,502	11,949	9,751	93	1,512	90.9	79.0
Lauderdale	8	2	147	351	296	5	45	59.3	61.3
Madison	32	27	418	1,154	996	16	99	42.1	52.0
Hardeman	0	25	148	230	165	1	40	58.2	46.4
Dyer	6	33	110	371	283	5	49	30.1	45.3
Haywood	0	6	81	208	173	2	29	46.4	42.2
Hamblen	4	39	228	720	534	13	143	34.7	42.2
Tipton	8	16	258	485	391	17	70	41.9	38.4
Warren	14	6	49	407	305	1	82	11.6	37.2
Lake	2	0	24	36	26	2	8	36.5	36.8
Crockett	3	4	20	99	80	11	12	14.3	34.6
Montgomery	17	97	907	1,675	1,246	24	315	38.7	34.3
Hamilton	39	141	1,220	2,863	2,203	32	480	32.4	33.7
Obion	1	12	73	269	216	15	40	24.0	33.2

CrimeInsight 2023-2024 Trend Analysis

The crime trend layer compares selected TBI CrimeInsight crime/weapons indicators between 2023 and 2024. The trend table is used as supporting context and is not directly embedded into the final score unless separately modeled. It helps identify counties with rising selected crime/weapons pressure.

County	Selected Crime 2023	Selected Crime 2024	Abs. Change	Pct. Change	Weapons YoY	Violent YoY	Trend Signal
Shelby	35,612	45,708	10,096	28.3	3,529	3,284	Sharp Increase
Davidson	21,945	30,493	8,548	39.0	1,743	3,399	Sharp Increase
Knox	5,088	7,409	2,321	45.6	365	976	Sharp Increase
Rutherford	3,876	5,457	1,581	40.8	269	659	Sharp Increase
Montgomery	2,782	4,281	1,499	53.9	295	598	Sharp Increase
Sumner	1,072	2,138	1,066	99.4	202	433	Sharp Increase
Washington	1,241	2,206	965	77.8	68	451	Sharp Increase
Sullivan	2,107	2,983	876	41.6	112	381	Sharp Increase
Madison	1,887	2,742	855	45.3	209	322	Sharp Increase
Wilson	876	1,712	836	95.4	229	301	Sharp Increase
Blount	1,091	1,879	788	72.2	103	338	Sharp Increase
Bradley	971	1,685	714	73.5	136	287	Sharp Increase
Hamilton	6,272	6,978	706	11.3	161	271	Increasing
Maury	1,266	1,968	702	55.5	78	314	Sharp Increase
Hamblen	1,060	1,681	621	58.6	61	276	Sharp Increase

Top counties by selected crime/weapons YoY increase.

CrimeInsight Offense Mapping Validation

This validation table documents how raw TBI CrimeInsight offense labels are mapped into model input fields. Unmapped labels are retained for audit review but are not included in the crime/weapons score unless intentionally mapped into a model field.

CrimeInsight Label	Normalized Label	Mapped Model Field	Total Count
Aggravated Assault	aggravated assault	aggravated_assault_count	52,256
Arson	arson	arson_count	1,037
Murder	murder	homicide_count	902
Kidnapping/Abduction	kidnapping abduction	kidnapping_abduction_count	3,132
All Rape	all rape	sex_offense_count	3,645
Criminal Sexual Contact	criminal sexual contact	sex_offense_count	3,678
Incest	incest	sex_offense_count	37
Statutory Rape	statutory rape	sex_offense_count	498
Weapon Law Violations	weapon law violations	weapons_law_violation_count	24,940

ACLED Political Violence & Civil Unrest Layer

The political violence and civil unrest layer uses ACLED-derived Tennessee event data aggregated to the county level. The model preserves only county-level aggregate counts and rates. It does not publish event notes, actor names, organization names, exact locations, coordinates, URLs, or site-level maps.

County	Protest	Violent Unrest	Political Violence	Strategic Dev.	Public Disorder	Total Events	Fatalities	ACLED Score
Davidson	98	1	1	40	99	140	7	100.0
Shelby	74	0	1	1	74	76	1	44.2
Trousdale	1	0	0	0	1	1	0	32.8
Knox	30	0	0	5	30	35	0	25.8
Hamilton	20	0	0	4	20	24	0	22.9
Polk	1	0	0	0	1	1	0	21.9
Giles	1	0	0	1	1	2	0	19.1
Washington	5	0	0	3	5	8	0	18.6
Franklin	2	0	0	0	2	2	0	17.9
Henderson	1	0	0	0	1	1	0	14.0
Dickson	2	0	0	0	2	2	0	14.0
Hawkins	2	0	0	0	2	2	0	13.6
Williamson	7	0	0	3	7	10	0	12.8
Tipton	2	0	0	0	2	2	0	12.8
Madison	3	0	0	0	3	3	0	11.9

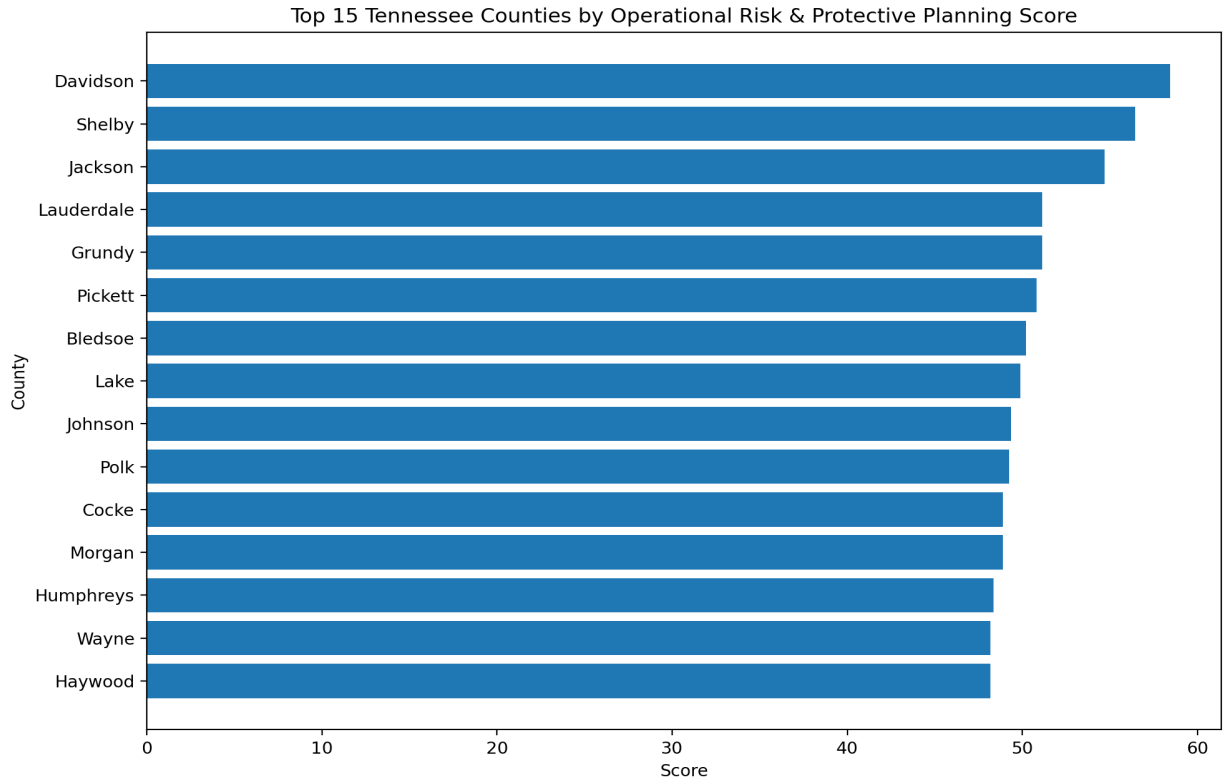

Operational Risk & Protective Planning Layer

The operational-risk layer is a separate defensive planning layer. It is designed to help interpret where county-level exposure, infrastructure pressure, transportation pressure, public-safety context, healthcare capacity, FEMA vulnerability/resilience, and CSLLEA law-enforcement response-capacity baseline may create greater protective-planning complexity. This layer is not a targeting product and does not identify facilities, addresses, routes, individuals, schedules, agency-level tactical details, or exploitable vulnerabilities.

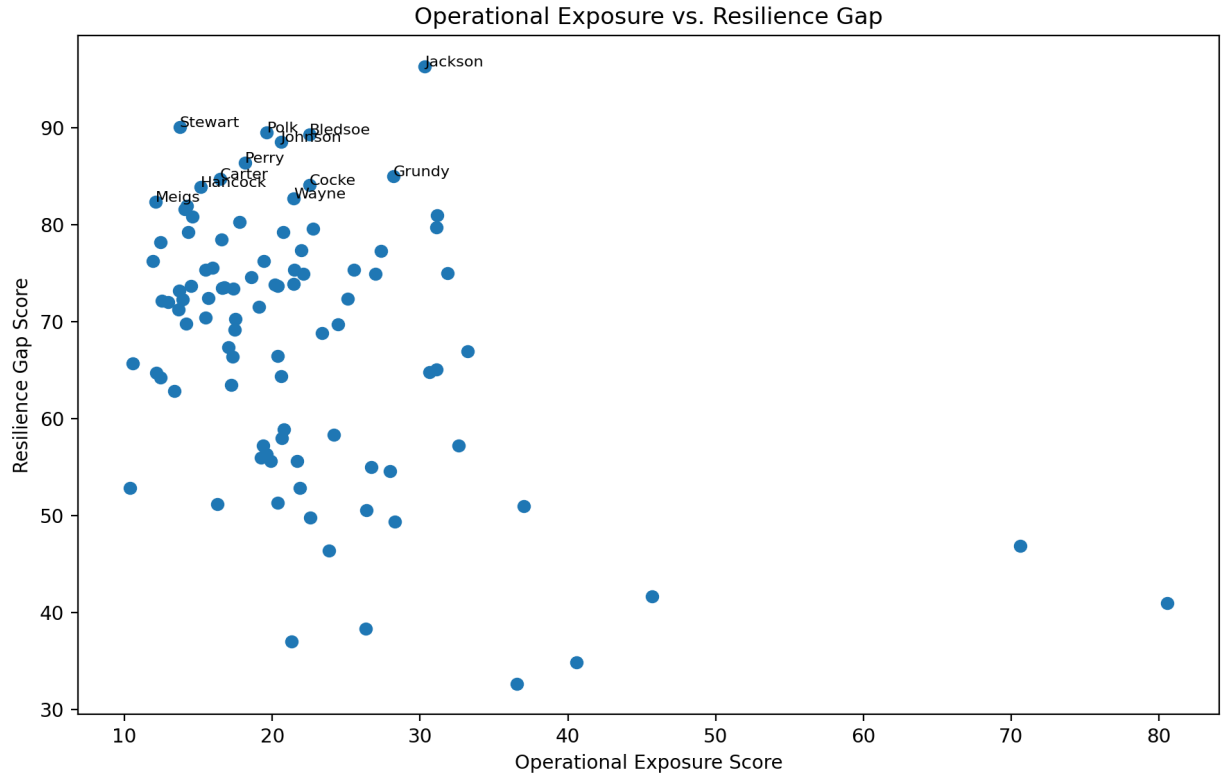

Component	Interpretation	Model Treatment
Operational Exposure	Population density, transportation pressure, infrastructure pressure, public-safety context, and socioeconomic pressure.	Higher values increase operational-risk context.
Resilience Gap	Healthcare capacity gap, FEMA resilience gap, FEMA vulnerability, and law-enforcement capacity gap.	Higher values indicate weaker response-capacity / resilience context.
Law-Enforcement Capacity	CSLLEA 2018 county-level response-capacity baseline.	Used as a defensive capacity proxy, not as a threat indicator.
Infrastructure Pressure	TACIR public infrastructure needs per capita.	Used as a broad continuity and public-sector pressure proxy.

Higher law-enforcement capacity gap values indicate lower relative county-level response-capacity proxy values in the 2018 CSLLEA baseline. They should not be interpreted as agency performance ratings, current staffing adequacy, or tactical capability assessments.

County	Final Op. Risk	Tier	Exposure	Resilience Gap	Infrastructure	Healthcare Gap	LE Capacity Gap	Data Quality
Davidson	58.4	Elevated	80.6	40.9	90.3	37.0	56.1	Strong
Shelby	56.4	Elevated	70.6	46.8	24.6	44.3	27.4	Strong
Jackson	54.7	Elevated	30.3	96.3	95.9	98.0	93.8	Strong
Lauderdale	51.1	Elevated	31.2	80.9	78.9	94.5	76.5	Strong
Grundy	51.1	Elevated	28.2	85.0	65.8	96.8	48.7	Strong
Pickett	50.8	Elevated	31.1	79.7	100.0	97.7	57.7	Strong

Lake	49.9	Moderate	31.9	75.0	89.9	100.0	36.8	Strong
Johnson	49.3	Moderate	20.6	88.5	51.2	92.5	70.2	Strong
Polk	49.2	Moderate	19.6	89.5	39.3	93.6	92.1	Strong
Cocke	48.9	Moderate	22.5	84.1	38.7	85.7	64.6	Strong
Morgan	48.9	Moderate	27.3	77.3	87.3	99.5	68.9	Strong
Humphreys	48.3	Moderate	33.2	66.9	99.5	87.5	60.3	Strong
Wayne	48.2	Moderate	21.4	82.7	60.3	86.2	66.6	Strong
Haywood	48.2	Moderate	27.0	74.9	52.8	96.0	79.8	Strong

Top counties by final operational-risk score.

Operational exposure compared with resilience gap. Counties in the upper-right quadrant warrant closer defensive planning review.

Data Quality & Model Confidence

The model includes a data-quality layer that measures whether each county has usable data from the active Phase 6 source layers: ACS, CBP, FDIC, FFL, FEMA, disaster/disruption, TBI CrimeInsight crime/weapons, TBI crime rate, ACLED, TBI gang activity, TBI explosive-use activity, TBI gang + explosives intersection data, hate-crime offenses, law-enforcement ambush, targeted harm / public-safety, and institutional/enforcement pressure. This score does not measure risk. It measures source coverage.

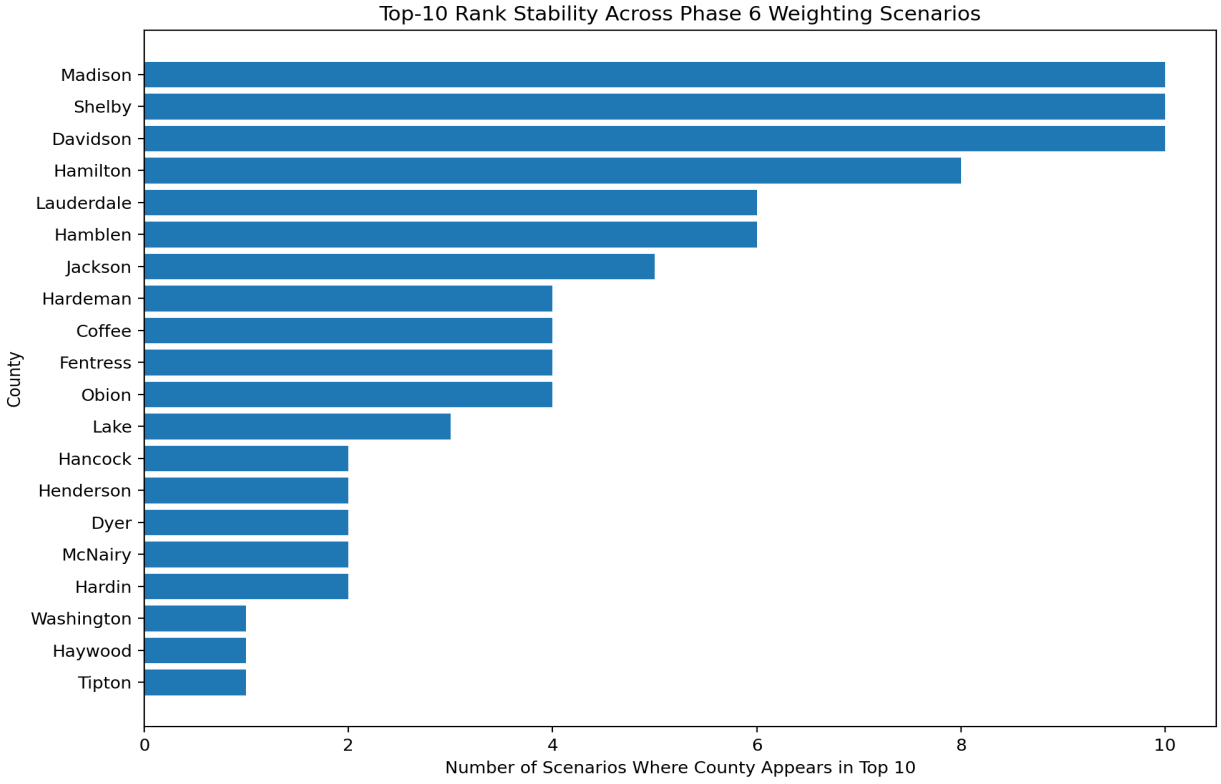

County	ACS	CBP	FDIC	FFL	FEMA	Disrupt.	Crime	Rate	ACLED	Gang	Expl.	G+E	Hate	Ambush	Inst.	Completeness	Confidence
Davidson	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Shelby	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Madison	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Hamilton	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Hamblen	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Lauderdale	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Jackson	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Hardeman	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Lake	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Coffee	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Hancock	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Hardin	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Obion	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Cocke	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High
Washington	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	Y	100.0	High

Data-quality notes are retained in outputs/tables/tn_county_data_quality_flags.csv. Lower completeness should be interpreted as lower confidence in the county's ranking, not as lower or higher risk by itself.

Model Sensitivity & Rank Stability

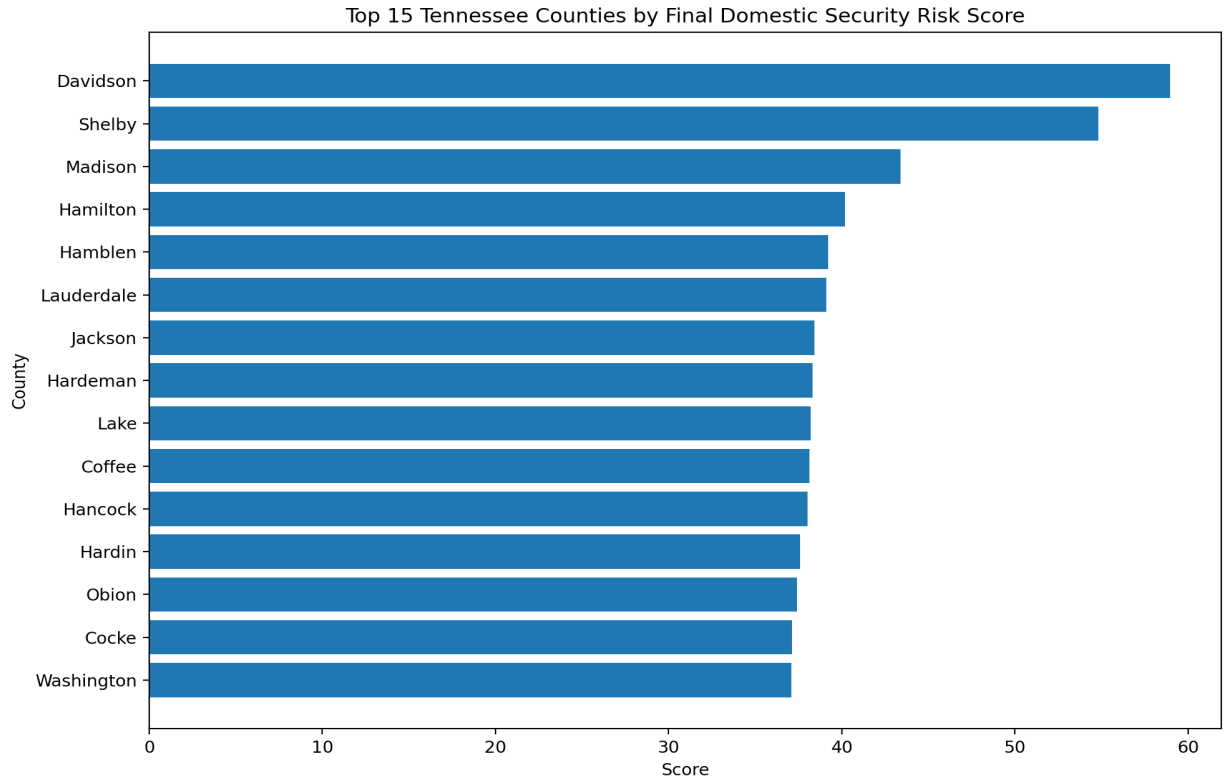

The Phase 6 sensitivity-analysis layer tests whether county rankings remain stable when the final score weights are adjusted. Scenarios include finance-heavy, organized-violence-heavy, targeted-harm/public-safety-heavy, institutional/enforcement-heavy, gang/explosives-heavy, political-violence-heavy, disaster/disruption-heavy, socioeconomic-heavy, and tactical-access-heavy alternatives.

County	Top-10 Scenario Count	Best Rank	Worst Rank	Average Rank	Rank Range	Stability Signal
Davidson	10	1	2	1.1	1	Very Stable
Shelby	10	1	2	1.9	1	Very Stable
Madison	10	3	6	3.8	3	Very Stable
Hamilton	8	3	22	7.6	19	Moderately Sensitive
Lauderdale	6	3	23	9.9	20	Moderately Sensitive
Hamblen	6	4	36	10.9	32	Highly Sensitive
Jackson	5	3	48	16.0	45	Highly Sensitive
Obion	4	8	21	13.2	13	Stable
Coffee	4	5	26	14.3	21	Moderately Sensitive
Hardeman	4	6	43	14.6	37	Highly Sensitive
Fentress	4	4	35	14.7	31	Highly Sensitive
Lake	3	5	38	15.7	33	Highly Sensitive
Hardin	2	6	29	16.5	23	Moderately Sensitive
Dyer	2	8	32	20.1	24	Moderately Sensitive
Henderson	2	8	31	20.1	23	Moderately Sensitive

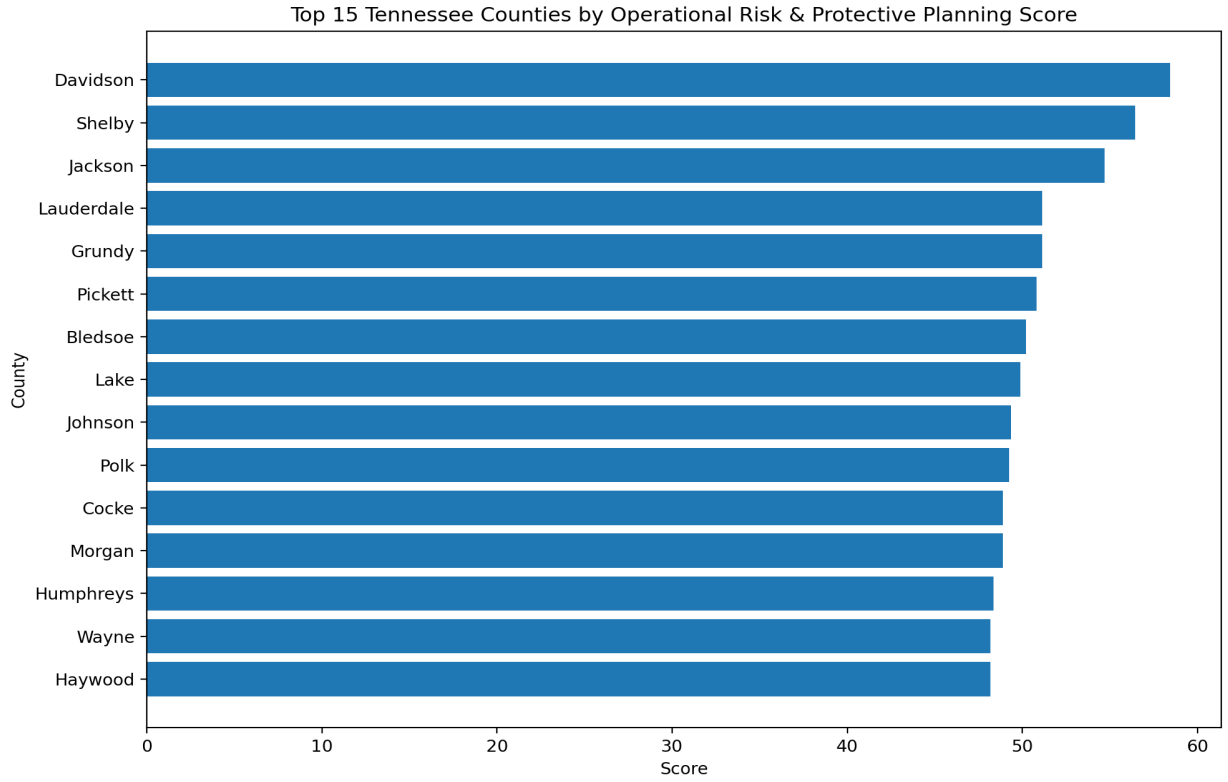

Counties appearing in the top 10 across multiple alternative weighting scenarios.

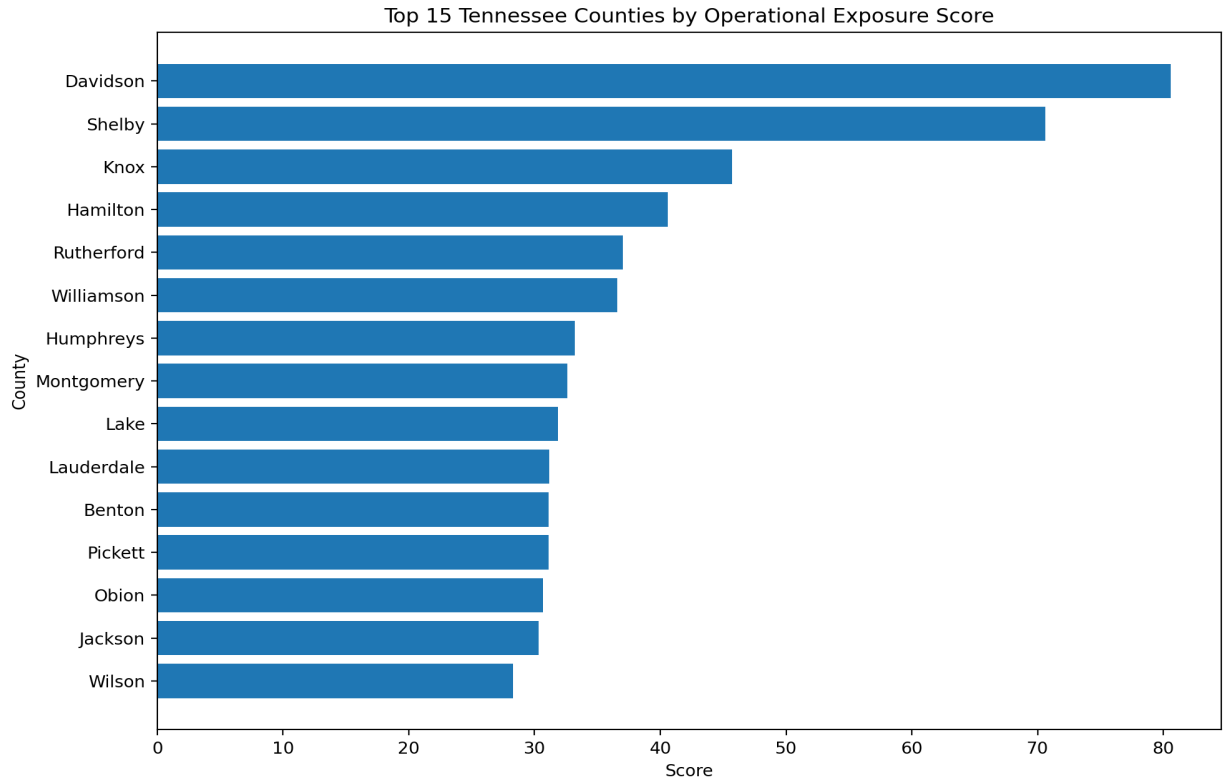

Risk Visualizations

Gang + explosive intersection pressure vs. final domestic security risk.

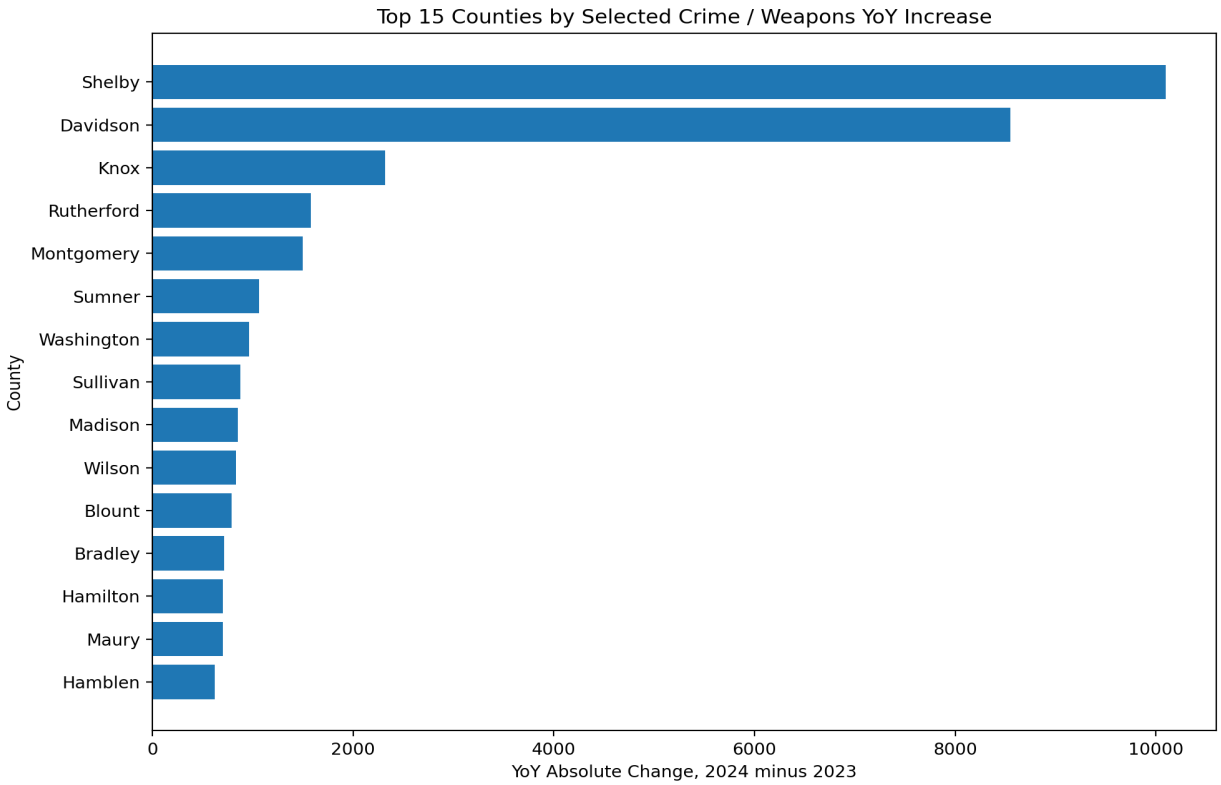

ACLED political violence / civil unrest exposure vs. final domestic security risk.

Top-10 rank stability across Phase 6 alternative weighting scenarios.

Best average rank across Phase 6 alternative weighting scenarios.

Top counties by selected crime/weapons YoY increase.

Top County Deep Dive

Davidson

Davidson has a final domestic security risk score of **59.0**, corresponding to a model signal of **Elevated**. The county's finance and tactical vulnerability score is **42.9**, organized violence / high-severity crime pressure score is **60.0**, political violence / civil unrest exposure score is **100.0**, and model confidence is **High**. Interpreted operationally, this county is classified as: **Elevated monitoring priority**.

Model Confidence	High
Final Domestic Security Risk Score	39.2

Methodology

The model uses a weighted index approach. Each county-level indicator is normalized to a 0-to-100 score using min-max scaling. Higher values indicate higher relative exposure or vulnerability. Component scores are then combined into broader indices, including household financial stress, banking access gap, cash-intensive retail exposure, tobacco/vape exposure, tactical-access exposure, organized violence / high-severity crime pressure, targeted harm / public-safety pressure, ACLED political violence / civil unrest exposure, disaster/disruption vulnerability, institutional/enforcement pressure, and the final domestic security risk score.

The operational-risk layer is intentionally calculated outside the main domestic-security risk score. It combines an existing threat-context score with operational exposure and resilience-gap indicators. This separation prevents response-capacity and protective-planning indicators from being misread as threat indicators.

Final Phase 6 Score Component	Weight
Finance & Tactical Vulnerability	30%
Organized Violence / High-Severity Crime Pressure	20%
Political Violence / Civil Unrest Exposure	15%
Household Financial Stress	15%
Disaster / Disruption Vulnerability	10%
Tactical Access Exposure	5%
Institutional / Enforcement Pressure	5%

Organized Violence / High-Severity Crime Subcomponent	Weight
TBI Crime / Weapons Pressure	30%
Overall Crime Rate Index	15%
Gang-Related Criminal Activity Pressure	18%
Explosive-Use Criminal Activity Pressure	13%
Gang + Explosive Intersection Pressure	13%
Targeted Harm / Public-Safety Pressure	11%

The model should be interpreted as a county-level relative exposure and monitoring-priority framework. It does not establish causation, predict incidents, identify threat actors, or determine whether criminal activity, extremist activity, or terrorism exists in a county. Gang-related crime, explosive-use activity, hate-crime offense counts, law-enforcement ambush counts, and the gang + explosive intersection layer are county-level indicators only. They are not labels for terrorism, motive, ideology, or actor identity.

The tactical-access, regulated-retail, FFL, crime/weapons, gang, explosives, and political violence / civil unrest components are sensitive and should be interpreted carefully. Firearm retail, FFL licensing, tactical training, sporting goods, surplus retail, tobacco/vape retail, pawn/used merchandise, lending, convenience stores, and other business categories are lawful commercial activities. Their inclusion in this model is based only on aggregate exposure logic.

Appendix: Publicly Documented Group / Network Reference Register

This appendix presents source-documented public group / network references from approved public sources. It is a reference-only layer and is **not included in the model score**. It should not be interpreted as a terrorism, extremism, criminality, operational-presence, or county-risk label. The table intentionally excludes addresses, coordinates, individual names, social handles, meeting locations, recruitment channels, case narratives, and operational details.

Note: Only the first 25 report-ready references are displayed in the PDF. The full validated reference table is saved in outputs/tables.

Appendix: TDOC STG Correctional-System Context

This appendix presents sanitized Tennessee Department of Correction Security Threat Group (STG) correctional-system context. It is a **non-scoring** reference layer and is not included in the county risk score, organized-violence score, public group reference score, operational-risk score, scenario analysis, or county ranking. FY2025 rows summarize facility-level confirmed and suspected TDOC correctional classifications. Historical 2010 rows provide broad institutional context only. These rows should not be interpreted as current community presence, county-level activity, terrorism, ideology, or suspicious conduct by any person, group, business, facility, or place.

Validation Summary

Validation Item	Status	Detail
row_count	OK	20 TDOC STG reference rows created.
non_scoring	OK	All rows must have include_in_score=False.
fy2025_facility_total_rows	OK	Found 14 FY2025 facility-total rows; expected 14.
fy2025_facility_counts_populated	OK	All FY2025 facility-total rows have confirmed/suspected/total counts.
fy2025_facility_count_consistency	OK	All FY2025 facility-total rows satisfy confirmed + suspected = total.
prohibited_detail_screen	OK	No prohibited detail terms found.
correctional_context_flag	OK	All rows should be clearly marked as correctional-system context.

FY2025 Facility-Level Aggregate Context

Facility Context	Confirmed	Suspected	Total	Source Page

Appendix: TBI 2024 Hate Crime Context

This appendix summarizes statewide context from the Tennessee Bureau of Investigation 2024 Hate Crime Report. It is a context-only layer and is **not included in model scoring**. It does not replace the county-level TBI hate-crime offense input used in the targeted-harm layer. The context tables do not retain agency-level, incident-level, victim-level, suspect-level, address, coordinate, narrative, or case-level records.

Statewide Context Summary

Context Item	Value	Note
known_bias_total_2024	131	Total known bias motivations in the TBI 2024 Hate Crime Report, excluding Unknown bias from analysis.
unknown_bias_total_2024	22	TBI notes Unknown bias is being reviewed and is generally not a hate crime unless later categorized.
crimes_against_persons_total_2024	98	TBI report states Crimes Against Persons accounted for 74.24% of reported hate crimes in 2024.
crimes_against_property_total_2024	34	TBI report states Crimes Against Property accounted for 25.76% of reported hate crimes in 2024.
most_common_offense_2024	53	Intimidation was the most common reported bias-motivated offense, making up 40.15% of total reports.
not_cleared_total_2024	86	TBI report states the majority of hate crimes were not cleared.
cleared_by_arrest_total_2024	27	TBI report states that when a bias-motivated crime was cleared, it was more often cleared by arrest than by exceptional clearance.

Bias Motivation Context

Bias Category	2022	2023	2024	% Known Bias 2024
Race/Ethnicity/Ancestry Bias	94	62	94	71.76%
Religious Bias	18	18	9	6.87%
Sexual Orientation / Gender Bias	10	35	26	19.85%
Disability Bias	7	7	2	1.53%
Total Known Bias	129	122	131	100.00%
Unknown Bias	126	86	22	

Offense Type Context

Crime Category	Offense Type	2024 Total
Crimes Against Persons	Murder	0
Crimes Against Persons	Kidnapping/Abduction	0
Crimes Against Persons	Forcible Rape	1
Crimes Against Persons	Aggravated Assault	10
Crimes Against Persons	Simple Assault	34
Crimes Against Persons	Intimidation	53

Crime Category	Offense Type	2024 Total
Crimes Against Persons	Total	98
Crimes Against Property	Arson	7
Crimes Against Property	Destruction/Damage/Vandalism	24
Crimes Against Property	Robbery	0
Crimes Against Property	Theft - Shoplifting	1
Crimes Against Property	Theft From Building	1
Crimes Against Property	Theft - All Other Larceny	1
Crimes Against Property	Total	34

Clearance and Location Context

Clearance Type	2024 Total
Cleared by Arrest	27
Prosecution Declined	3
Victim Refused to Cooperate	4
Juvenile / No Custody	1
Not Cleared	86

Location Type	2024 Total
Residence/Home	46
Commercial	18
Educational Facility	28
Government/Public Building and other	7
Transportation	26
Highway/Road/Alley	16
Parking Lot/Garage	10
Recreational Spaces	5
Other/Unknown	4

Interpretation note: TBI hate-crime context strengthens the targeted-harm discussion, but it is not a terrorism indicator and is not included in the model score.

Source Register

Source	Use	Notes
U.S. Census Bureau ACS 5-Year API	County socioeconomic indicators	Used for population, poverty, unemployment, income, and rent burden proxies. Code includes fallback ACS years and .env Census API key support.
U.S. Census Bureau County Business Patterns API	County establishment counts by NAICS industry	Used for tobacco/vape, sporting goods, used merchandise, gas stations, convenience stores, lending, laundry, and used-auto proxies. The collector uses NAICS2017 plus LFO=001 and EMPSZES=001.
FEMA OpenFEMA Disaster Declarations Summaries v2	County disaster declaration exposure	Used as infrastructure and emergency-disruption vulnerability proxy. Collector uses the OpenFEMA /api/open/v2/DisasterDeclarationsSummaries endpoint.
Optional local disaster / disruption vulnerability CSV	County-level disaster, infrastructure disruption, access stress, and recovery strain proxy	County-level aggregate fields only. Expected fields include severe storm, flood, tornado, winter weather, wildfire, drought, power outage, outage duration, hospital access stress, airport access stress, road access stress, communications disruption, social vulnerability, recovery strain, and repeat disruption exposure. Do not include facility addresses, infrastructure maps, coordinates, utility network details, chokepoints, or operational vulnerability detail.
Optional local tactical-access aggregate CSV	County-level tactical access proxy	County-level counts only. No business names, addresses, owners, coordinates, URLs, or tactical site maps.
Optional local FDIC banking aggregate CSV	County-level banking access and deposit-depth proxy	County-level aggregates only. Expected fields include bank_branch_count and total_deposits_thousands. Do not include branch addresses, institution-specific records, routing information, customer data, coordinates, or branch-level detail.
Optional local ATF FFL aggregate CSV	County-level firearm-license access proxy	County-level aggregates only. Do not include licensee names, business names, addresses, coordinates, phone numbers, URLs, license numbers, owner names, or site-level maps. FFL counts are lawful licensing and access-complexity proxies only, not suspicious-activity indicators.
Optional local TBI CrimeInsight crime/weapons CSV	County-level crime and weapons pressure proxy	County-level aggregate counts only. Expected fields include homicide_count, kidnapping_abduction_count, weapons_law_violation_count, violent_crime_count, aggravated_assault_count, arson_count, and sex_offense_count. Do not include incident-level, victim-level, suspect-level, address, coordinate, or case-level records.
Optional local TBI crime-rate aggregate CSV	County-level overall crime rate and total crime count proxy	County-level aggregate values only. Produced by src/crime_rate_processor.py. Does not preserve agency-level, incident-level, victim-level, suspect-level, address, coordinate, or case-level records.
ACLED processed Tennessee aggregate CSV	County-level political violence and civil unrest exposure proxy	Derived from ACLED Tennessee events using county-level aggregation only. Model output does not preserve event notes, actors, exact coordinates, event-level locations, URLs, or site-level maps.

Source	Use	Notes
Optional local TBI gang-related criminal activity CSV	County-level organized/group criminal activity pressure proxy	County-level aggregate counts only. Produced by src/gang_activity_processor.py. Gang-related crime is not a terrorism label. Do not include gang names, individual names, incident IDs, addresses, coordinates, suspect/victim details, or case narratives.
Optional local TBI explosive-use criminal activity CSV	County-level explosive-use criminal activity pressure proxy	County-level aggregate counts only. Produced by src/explosives_processor.py. Explosive-use criminal activity is not a terrorism label. Do not include incident-level, address-level, suspect/victim, organization, coordinates, incident IDs, narratives, or case-level detail.
Optional local TBI gang-related explosive-use CSV	County-level gang-related explosive-use intersection pressure proxy	County-level aggregate counts only. Produced by src/gang_explosives_processor.py. Gang-related explosive-use activity is not a terrorism label. Do not include gang names, individual names, incident IDs, addresses, coordinates, organization names, suspect/victim details, or case narratives.
Optional local TBI hate-crime offense CSV	County-level targeted-harm / bias-motivated offense pressure proxy	County-level aggregate counts only. Produced by src/hate_crime_processor.py. Hate-crime offense counts are treated as targeted-harm / bias-motivated offense pressure indicators, not as terrorism indicators. Do not include victim details, suspect details, incident IDs, addresses, narratives, bias-detail notes, coordinates, agency case-level records, or individual-level data.
Optional local TBI law-enforcement ambush CSV	County-level public-safety personnel violence / tactical-planning proxy	County-level aggregate counts only. Produced by src/law_enforcement_ambush_processor.py. Law-enforcement ambush counts are treated as a public-safety personnel violence and tactical-planning proxy. They are not terrorism indicators by themselves and do not infer motive, ideology, or actor identity. Do not include officer names, suspect details, incident IDs, addresses, agency-level tactical details, coordinates, narratives, or case-level records.
SPLC Hate Map Tennessee 2024 CSV	Reference-only public group / network context appendix	Used only to create a public group / network reference register. This layer is not included in risk scoring. The model does not independently verify membership, activity, criminality, motive, ideology, or operational conduct. Do not include addresses, coordinates, individual names, social handles, meeting locations, recruitment channels, case narratives, or operational details.
TBI 2024 Hate Crime Report	Statewide targeted-harm / hate-crime context appendix	Used only for statewide hate-crime context tables. This layer does not replace county-level TBI hate-crime inputs and is not included in risk scoring. Outputs retain statewide aggregate context only and do not include agency-level, incident-level, victim-level, suspect-level, address, coordinate, narrative, or case-level records.
